else. The monkey will be upon the back of the legislature. You can say that we should do it this way, or we should do it this way. The problem that I want to point out to you is this. Senator Chambers when I proposed the other to require the person receiving unemployment compensation to take a job he said oh no, you can't do it. It might be degrading to the individual to make him work. It is better to let him do nothing and draw unemployment compensation. I suggest here today that you can't pass a law that forces a doctor to practice medicine. He's not going to do anything else perhaps, but he is not going to practice medicine and lose those resources which he has developed over the years. So, then what is the solution? The solution you know is what they have in Europe. Socialized Medicine. If you want poor health care, that is where you are going to get it. I suggest to you that you can listen to all of the arguments, good and bad, indifferent and pertinent, whichever you please. But, if you vote with me on this amendment you are opting for health care at the lowest possible cost irregardless of what it is. If you vote with the opposition you are opening the thing wide open. I would suggest that you vote with me and vote to adopt my amendment.
